

RoHS Compliance Declaration – TRIMET France SAS

This declaration is issued in accordance with Directive 2011/65/EU and its amendment Directive (EU) 2015/863 on the restriction of hazardous substances in electrical and electronic equipment (EEE).

TRIMET France SAS manufactures aluminium products, including primary aluminium and wire rods, intended for further industrial processing. These products are not electrical and electronic equipment (EEE) as defined under the RoHS Directive. Therefore, RoHS requirements do not directly apply to the products as supplied.

However, TRIMET France supports its customers in fulfilling their RoHS obligations by providing information on the presence of restricted substances.

Based on available data and supplier information, TRIMET France products comply with the substance restrictions defined in Article 4 of Directive 2011/65/EU, taking into account applicable exemptions listed in Annex III.

The substances listed in Annex II are not contained in our products or are not contained in higher concentrations than those specified in Annex II or Annex III of the current version of the Directive.

This declaration is reviewed periodically and updated without undue delay in case of regulatory changes, including updates to exemptions under the RoHS Directive.
